FIRE SCREENS

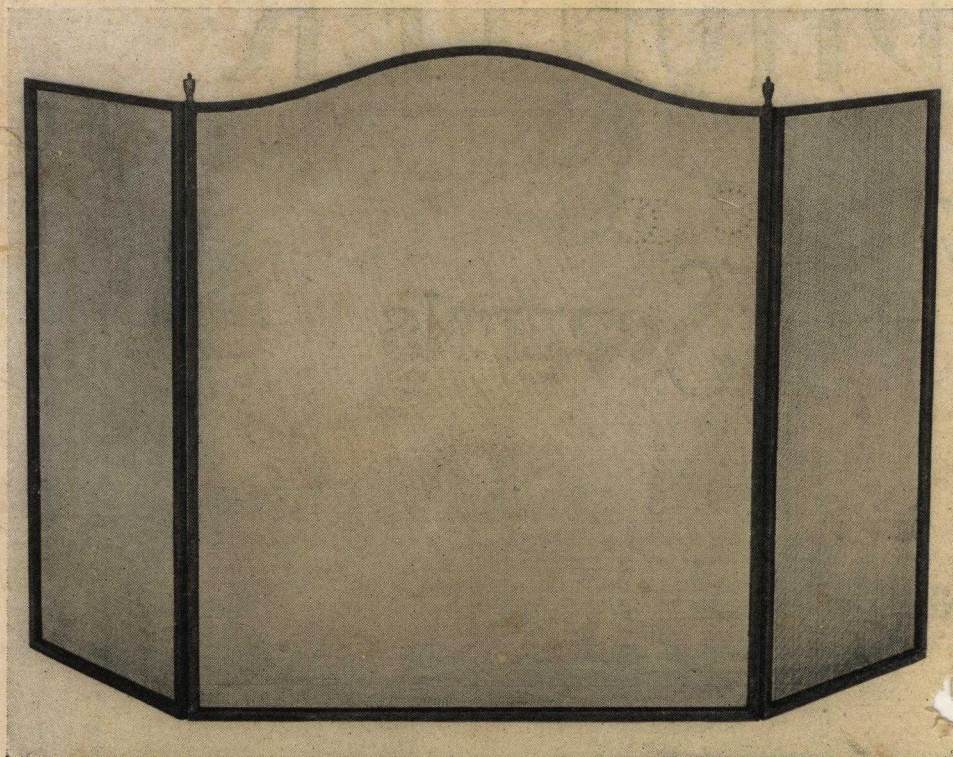

Bellows • Trivets • Firelighters
and Jamb Hooks

No. 709—A handsome hammered leaf design in antique steel finish with interesting brass finials. Centre panel 3' 2" x 3' 2", side panels 17 $\frac{3}{4}$ " wide.
For fire openings 3' 6" to 5' 0" wide.

119 EAST 57TH STREET, N. Y. CITY

No. 731—Heavy $\frac{1}{2}$ " square brass frame in antique finish; solid reinforced corner and rigid hinge construction. Centre panel 28" wide x 33" high, sides 13" x 30".

No. 731A—Same, in steel finish.

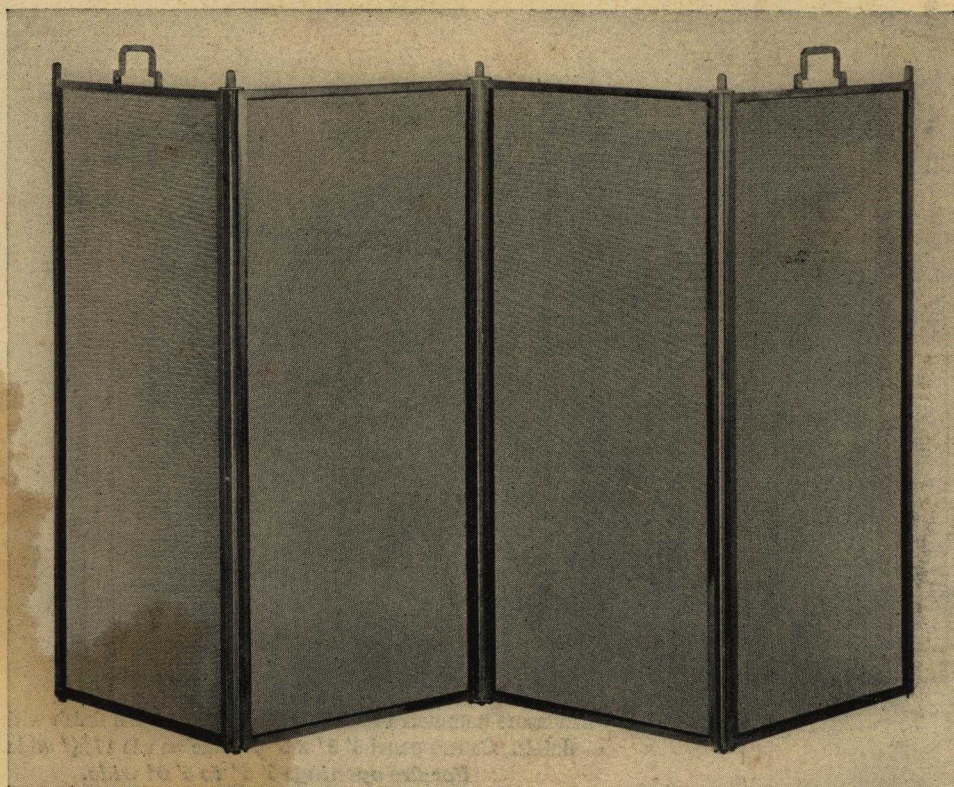

For fire openings 2' 6" to 4' 0" wide.

No. 1707—Turtle back shape, brown leather, cast brass nozzle. Hand painted bouquet of roses on mellow brown ground. Length 17 $\frac{1}{2}$ ".

No. 1802—Pierced brass top footman on wrought iron legs, 11 $\frac{1}{2}$ " x 7 $\frac{1}{2}$ " x 12" high.

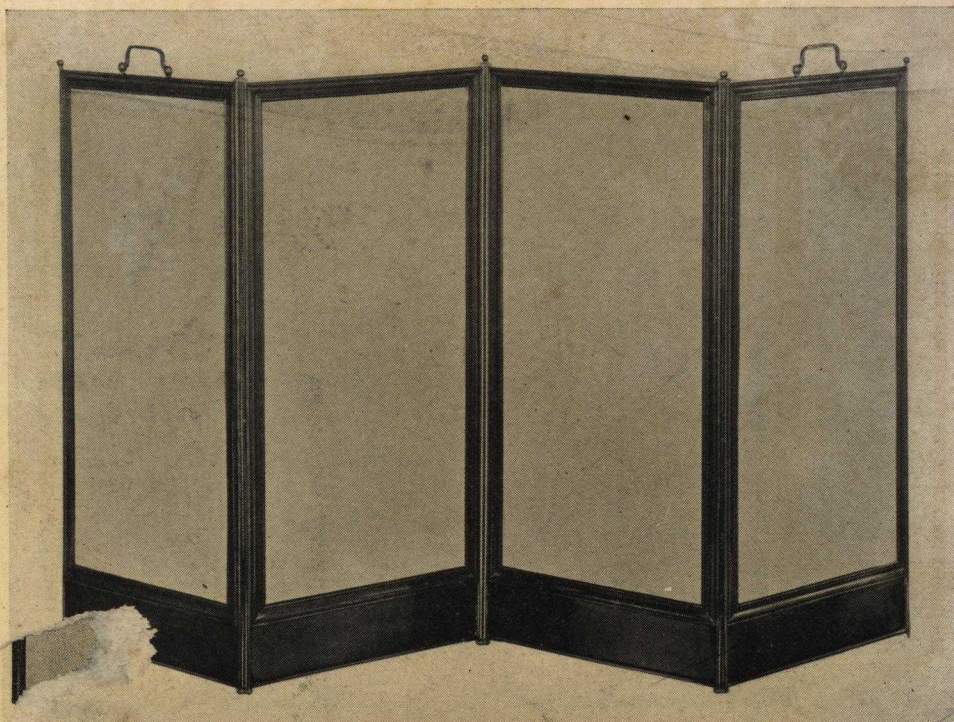

No. 717—Reinforced frame of $\frac{1}{16}$ " square brass tubing in bright finish. Each panel is 13 $\frac{1}{4}$ " wide x 30 $\frac{1}{4}$ " high.

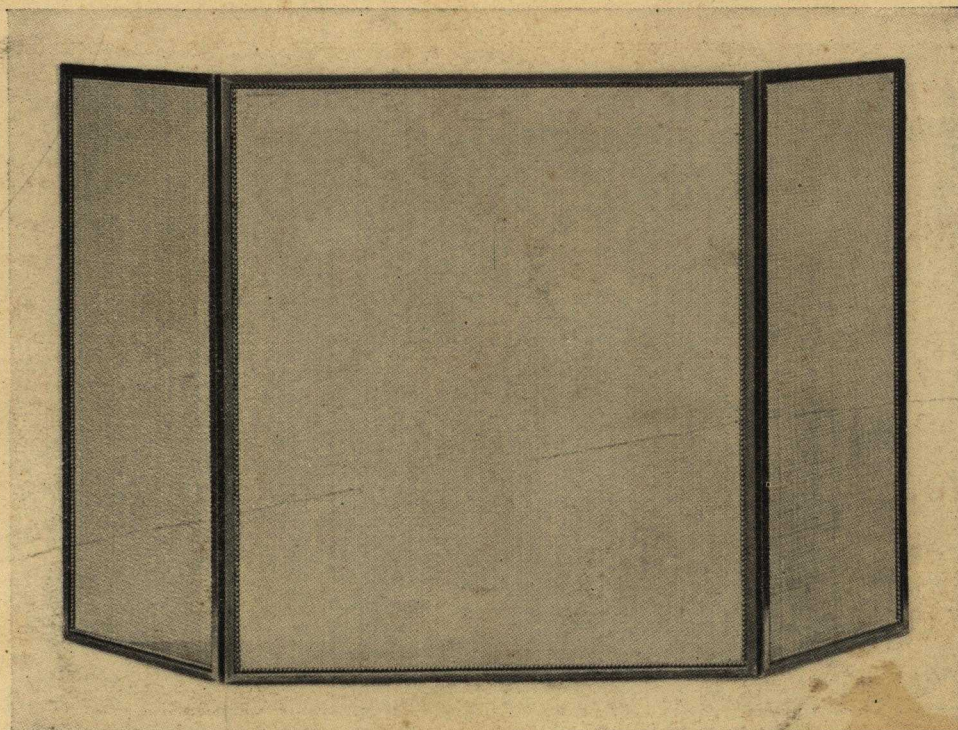

For fire openings 3' 0" to 4' 0" wide.

No. 1824—Pierced brass top trivet on wrought iron legs, 12" high.

No. 720—Moulded brass frame with brass mesh, in statuary bronze finish. Each panel is $13\frac{3}{16}$ " wide x $28\frac{3}{8}$ " high. No. 720A—Same, made $24\frac{3}{8}$ " high. Either size can be used for fire openings 2' 6" to 4' 0" wide.

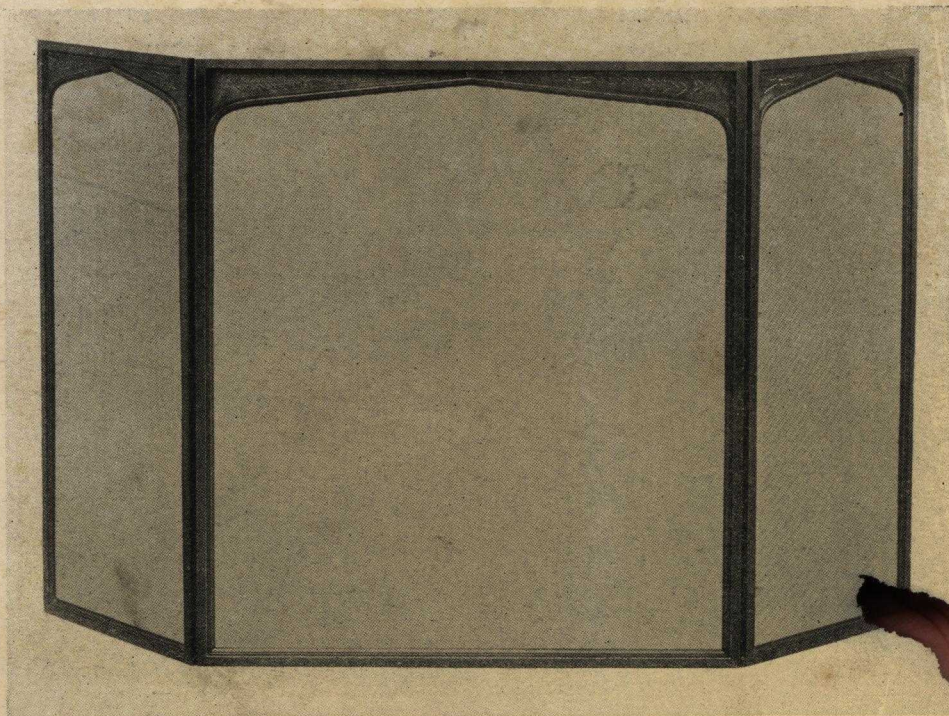

No. 712—Frame of 18 gauge square brass tubing, with brass beading inside border. This screen has solid corner reinforcements. Centre panel 28" wide x 30" high, sides 13" wide. No. 712A—Same, with steel finished frame. No. 719—Same as No. 712, without beading.

No. 719A—Same as No. 719, with steel finished frame.

For fire openings 2' 6" to 4' 0" wide.

No. 2504—Antique brass firelighter, $6\frac{1}{2}$ " high.

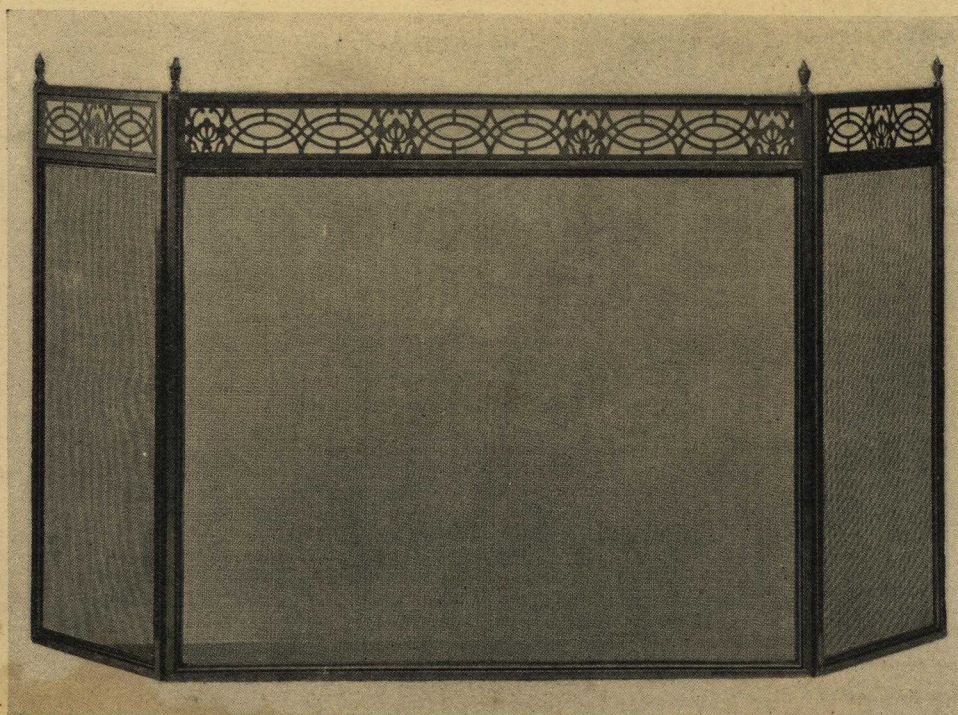

No. 732—Heavy $\frac{1}{2}$ " square brass frame with etched spandrels and moulded inside frame, in antique finish. Centre panel $26\frac{1}{2}$ " wide x 30" high, sides 13" wide.
For fire openings 2' 6" to 4' 0" wide.

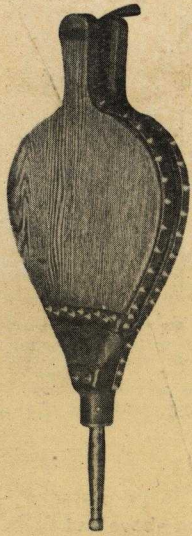

No. 1804—A very handsome all brass trivet with pierced and engraved rose top, 11" high.

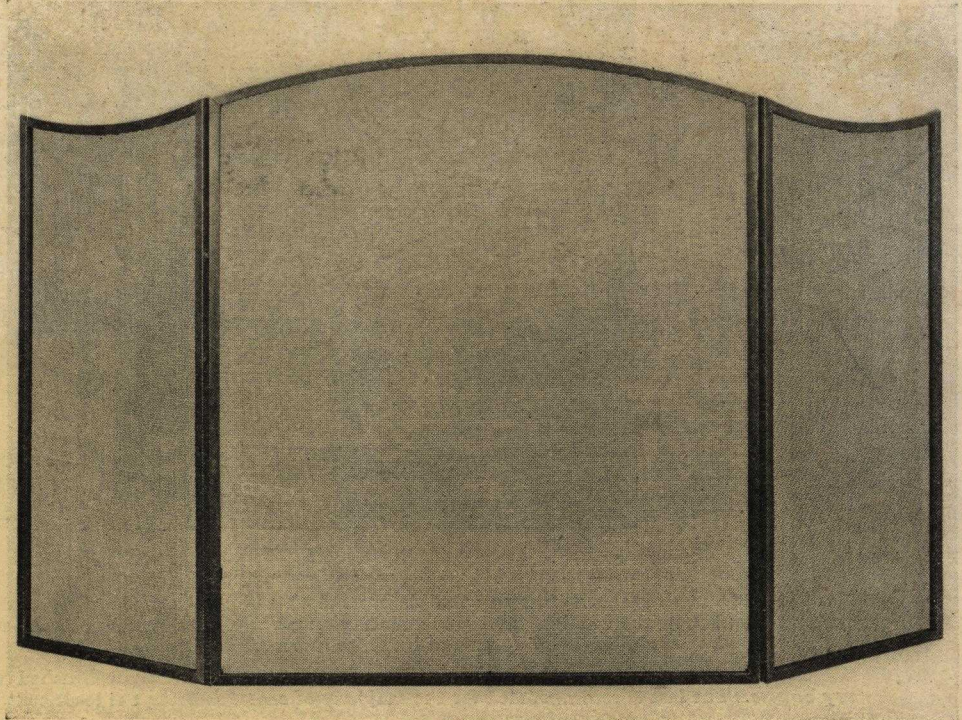

No. 1826—All brass footman, 11" x $7\frac{1}{2}$ " x 12" high.

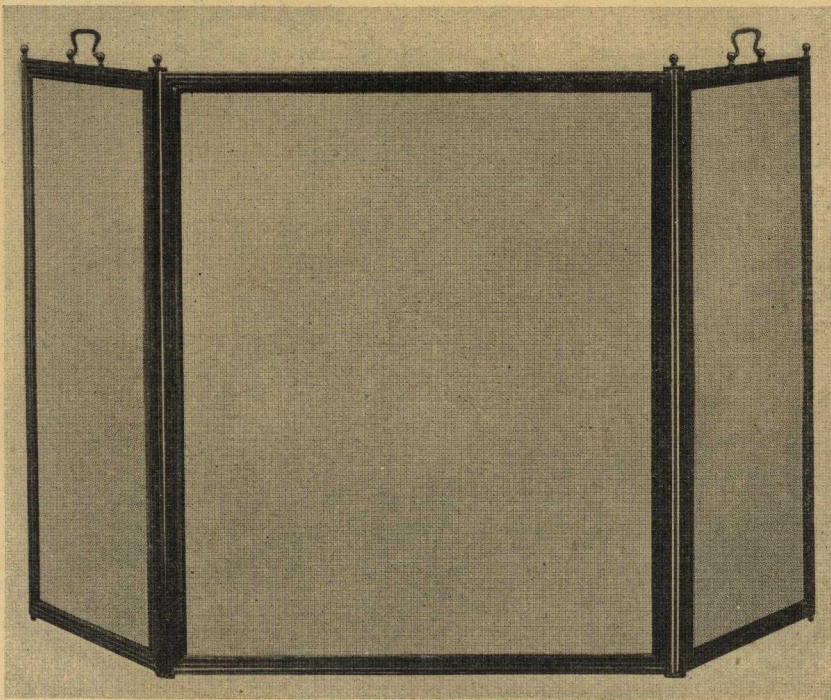

No. 711—Heavy $\frac{1}{2}$ " square tube frame in antique finished brass, with hand pierced top panels. Centre panel $26\frac{1}{2}$ " wide x 30" high, sides 13" wide. Special concealed corner reinforcements give to this screen unusual rigidity. No. 711A—Same, with steel finished frame. For fire openings 2' 6" to 4' 0" wide.

No. 1703—Waxed finish, with brown leather, brass nails and wrought iron nozzle. Length $23\frac{1}{2}$ ".

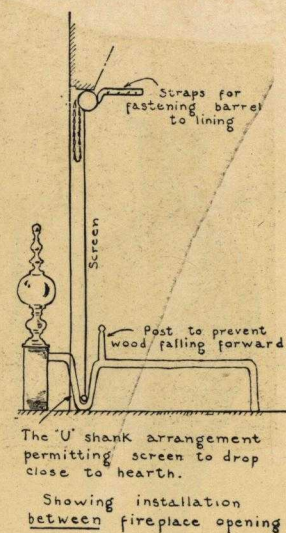

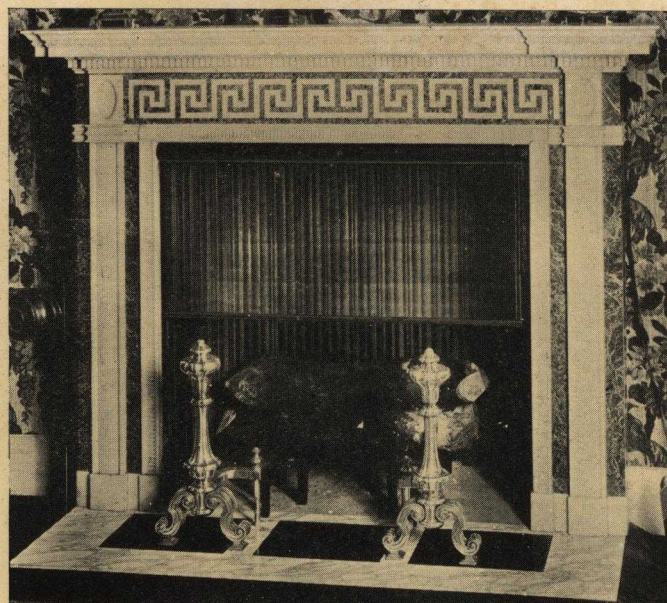

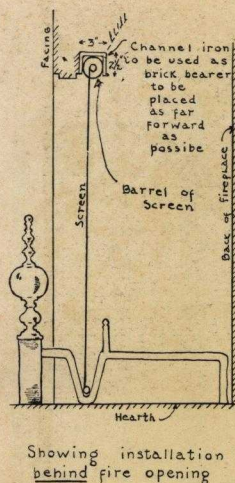

No. 726—Frame is $\frac{1}{2}$ " square heavy brass tubing, in antique finish, with solid corner reinforcements. Centre panel 26" wide x 30" high, sides $12\frac{1}{2}$ " x 28".
For fire openings 2' 6" to 3' 6" wide.

No. 739—Moulded brass frame with brass mesh, in statuary bronze finish. Centre panel 26" wide x 30" high, sides 13" wide.
For fire openings 2' 6" to 4' 0" wide.

No. 1806—Polished steel or brass footman, with under shelf, $13" \times 11\frac{1}{2}" \times 12"$ high.

ROLLING SCREENS

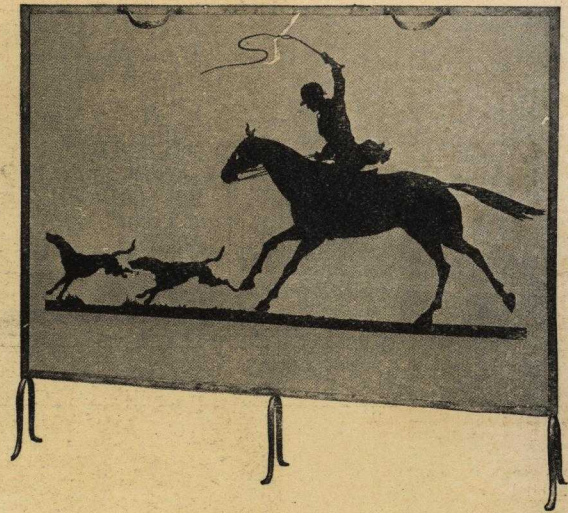

No. 734—The mesh is specially woven flexible brass cloth and can be made to any size. The illustration above and sketch to right show the usual method of installation, but where construction permits the screen barrel can be placed back of lintel, as indicated in sketch to left.

These screens can be supplied in any finish, as for example, black, bright, brushed or antique brass or dark statuary bronze. The last is recommended for the majority of cases, as being the least conspicuous.

When ordering or requesting estimates, kindly give the following information: Width of fire opening both at line of facing and 2" back from same point. The height of fire opening and depth of fire place from facing and if opening is rectangular or arched. Also the materials of which facings and linings are made.

No. 738—Hand wrought iron, in antique steel finish, with brass finials and base plate ornaments. Center panel 3' 3" wide x 3' 5" high, sides 1' 5 $\frac{3}{4}$ " wide.

THE

EVERY FIREPLACE IN THE HOUSE SHOULD HAVE A SCREEN It is safety insurance on which the premium is negligible. Stray sparks from the open fire may at any time burn holes in a hearth rug, even though the damage be not more serious. The use of a fire screen will eliminate entirely all such risk.

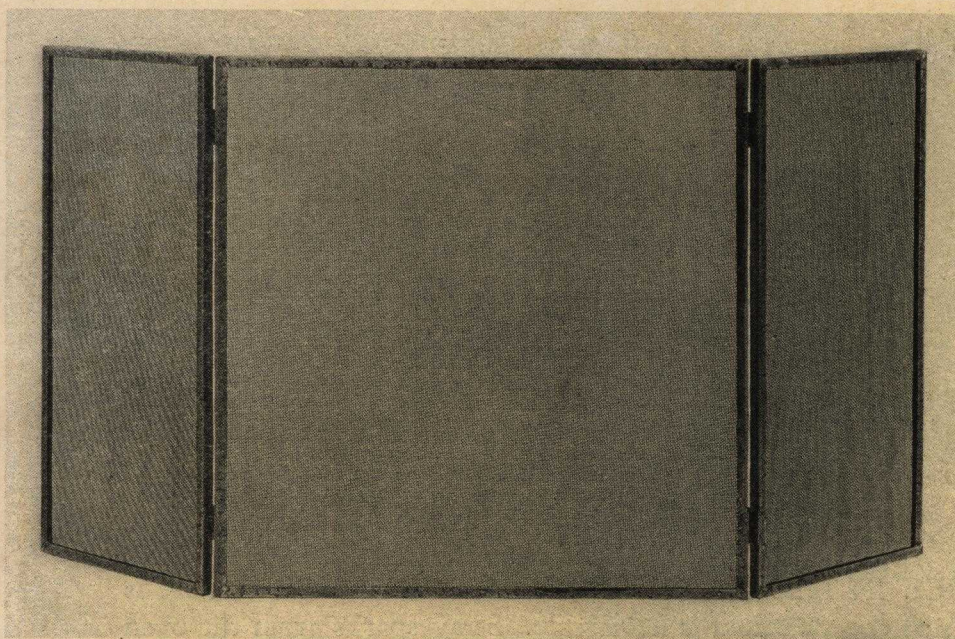

In addition to the conventional types of brass, steel or wrought iron, we make special designs to order.

The firescreen may be ornamental as well as useful and on this page are shown examples of decoration applied to the mesh. The *Iris* design is hand hammered repousse work, the others are flat silhouettes.

We shall be glad to assist you in making selections suitable for your fireplaces.

THE

No. 706—Rigid $\frac{5}{8}$ " x $\frac{5}{8}$ " iron angle frame, black or antique steel finish. Centre panel 30" x 30", sides 15" wide. No. 706A—Same, with antique brass frame.
For fire openings 3' 0" to 4' 0" wide.

No. 1703A—Dark oak with polished steel or brass applique and hand wrought nozzle. Length 23 $\frac{1}{2}$ ".

No. 1705—Turtle back bellows, decorated with Bird of Paradise on black ground, 17 $\frac{1}{2}$ " long.

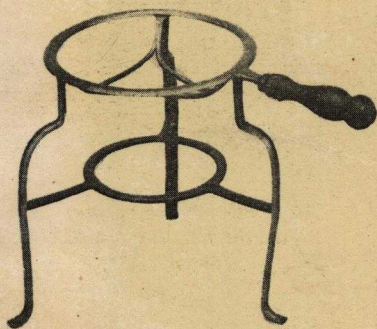

No. 1827—Polished steel trivet, top 9" in diameter, 11" high.

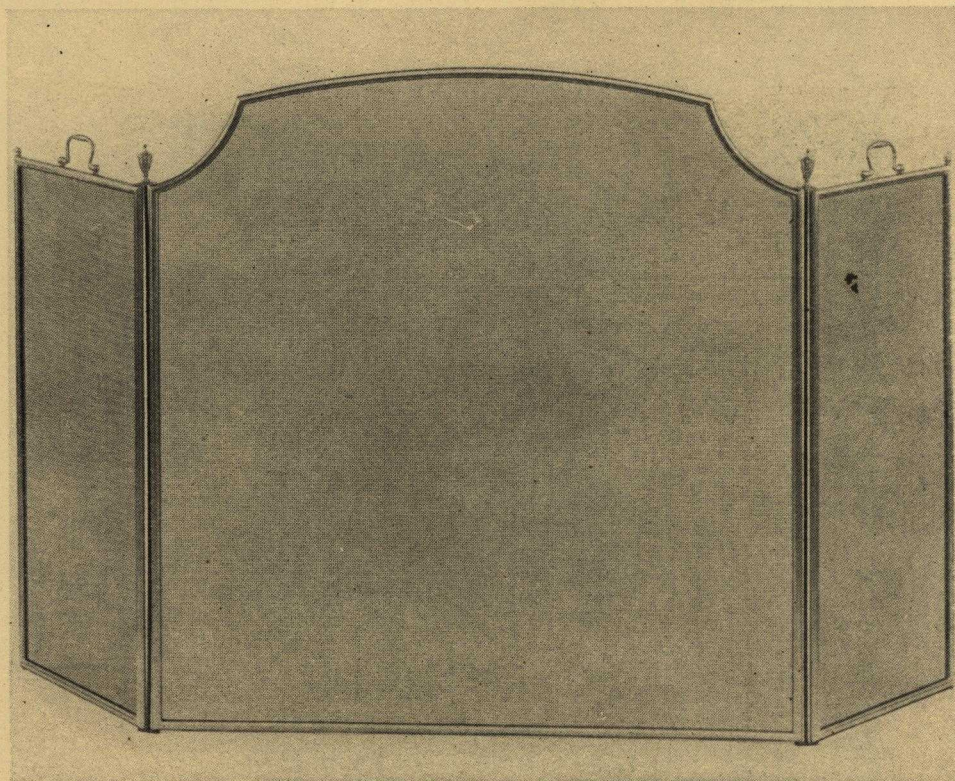

No. 2302—Hand forged toast fork with brassed handle, 30" long.

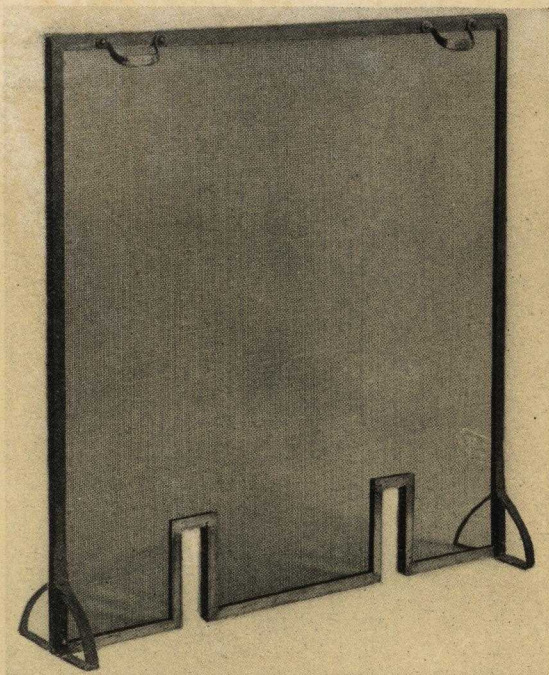

No. 1705

No. 1827

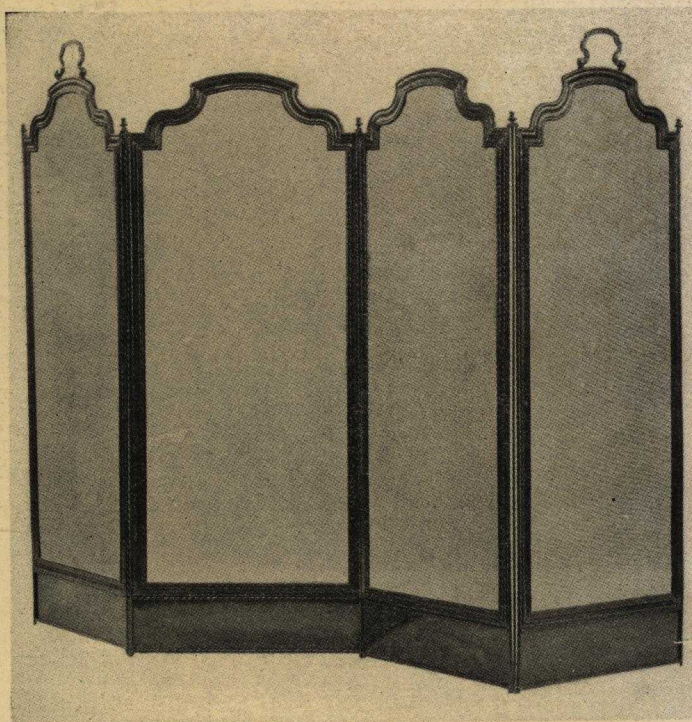

No. 724—Frame of $\frac{1}{2}$ " round brass tubing in antique finish. Centre panel 30" wide x 31" high, sides 12" x 25 $\frac{1}{2}$ ".
For fire openings 2' 6" to 4' 0" wide.

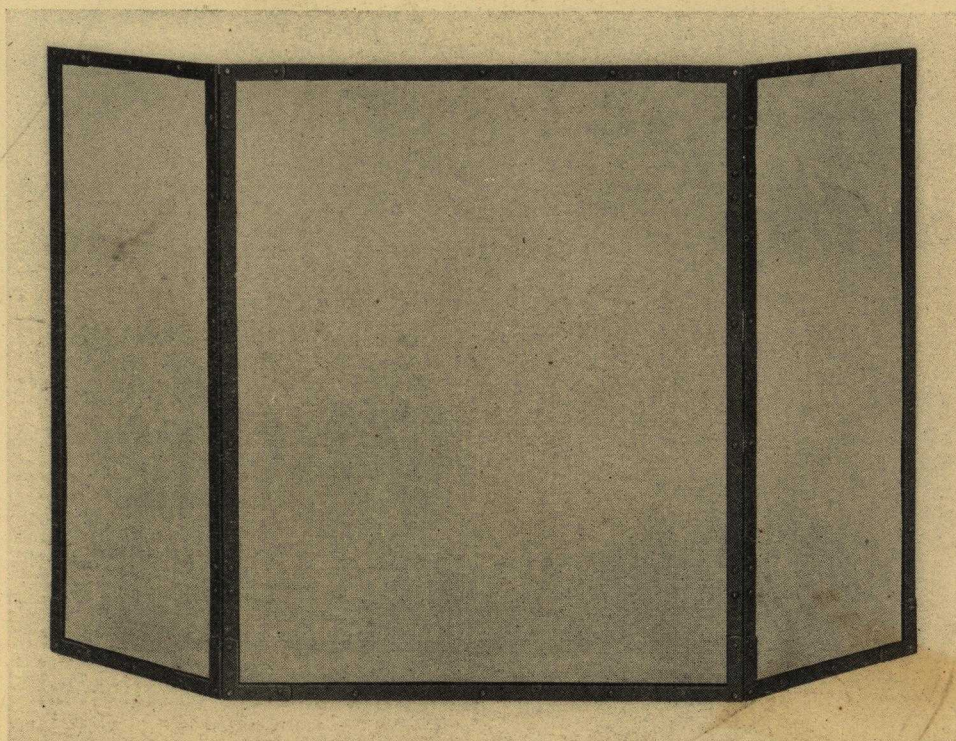

No. 707—Strong $\frac{5}{8}$ " x $\frac{5}{8}$ " angle iron frame, black or antique steel finish. Made to fit into fire opening, for use where it is desired to stand the andirons in *front* of the screen. No. 707A—Same, with antique brass frame. No. 707B—Same, made with $\frac{1}{2}$ " square brass tubular frame.

No. 708—Same as No. 707, without andiron slots. For use where andirons or grate are to be *back* of screen. No. 708A—Same as No. 708, with antique brass frame. No. 708B—Same, made with $\frac{1}{2}$ " square brass tubular frame.

Before ordering please read note on price list.

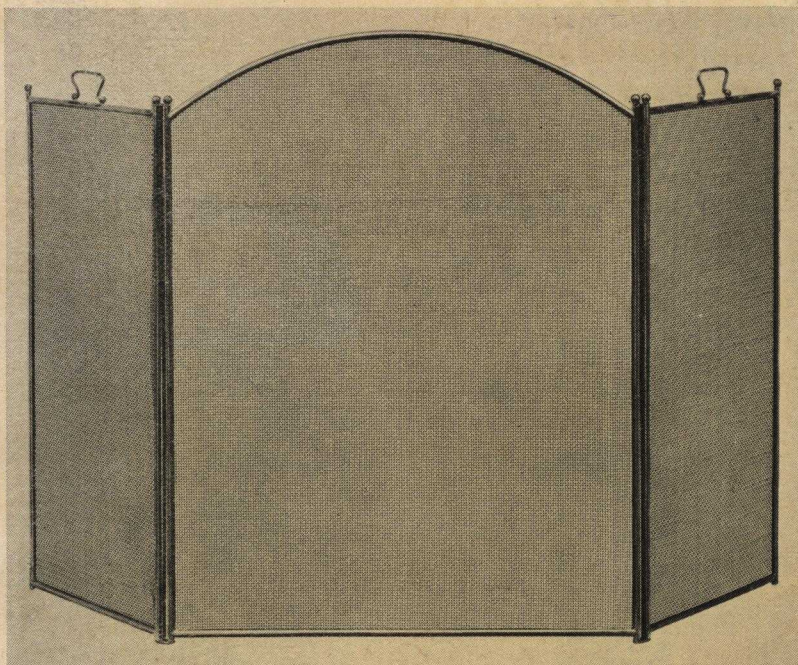

No. 721—Moulded brass frame with brass mesh, in statuary bronze finish. Each panel is $13\frac{3}{16}$ " wide x $31\frac{1}{4}$ " high. For fire openings 2' 6" to 4' 0" wide.

No. 700—Flat wrought iron frame $\frac{3}{4}$ " wide, in plain black finish. Centre panel 24" wide x 30" high, sides $11\frac{1}{2}$ " wide. No. 700A—Same in antique steel finish. For fire openings 2' 6" to 3' 6" wide.

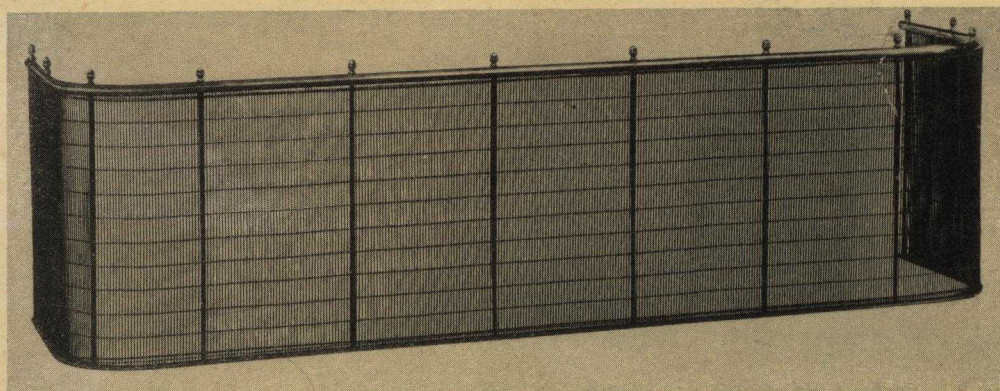

No. 2505—Wrought iron firelighter, in half polished finish.

No. 740

No. 2506—Brass firelighter in antique finish, 5" square base, 7 $\frac{3}{4}$ " high over knob.

No. 742

No. 742—An early design made of heavy black wires strongly braced, with bright brass top rail. Its rigid construction makes it useful for both fender and screen. Made 36" to 54" long and 15" or 18" high.

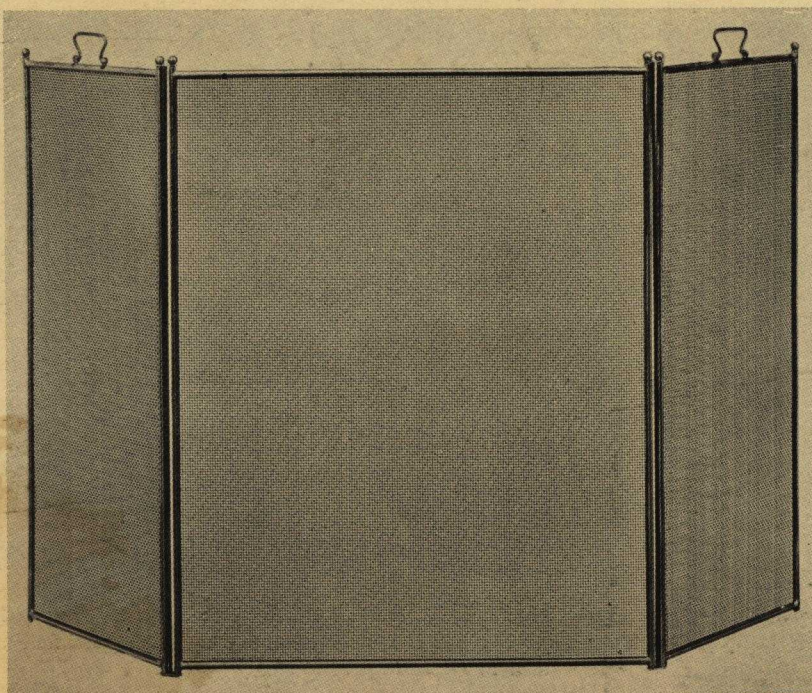

(Top of page)

No. 740—Polished brass $\frac{3}{8}$ " round frame. Center panel 24" wide x 30 $\frac{1}{2}$ " high, sides 13" wide x 27" high.
For fire openings 2' 6" to 4' 0" wide.

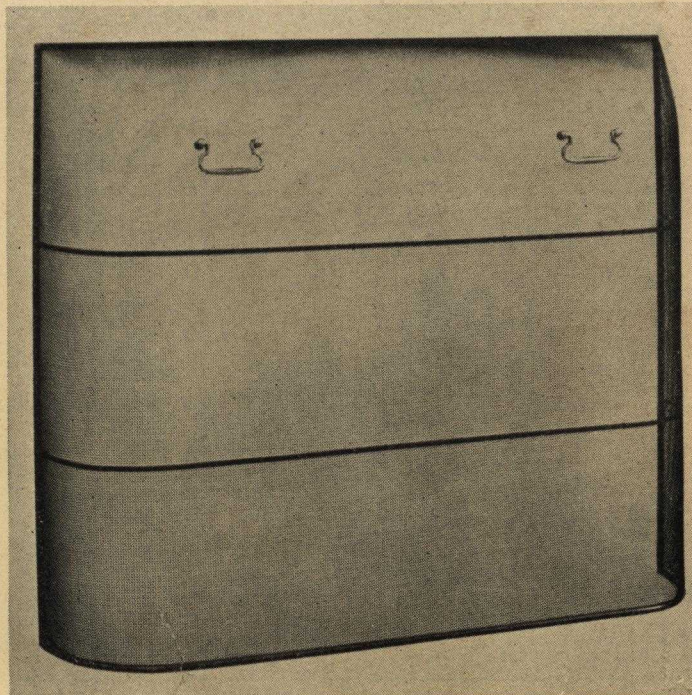

(To right)

No. 741—Polished brass $\frac{3}{8}$ " round frame. Center panel 24" wide x 30" high, sides 13" wide.
For fire openings 2' 6" to 4' 0" wide.

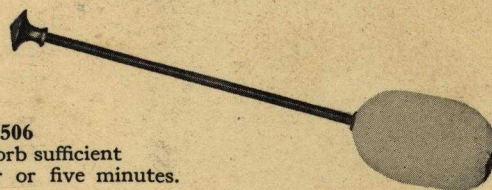

No. 1706—Turtle back shaped bellows, hand painted Cornucopia on black, green or yellow background.

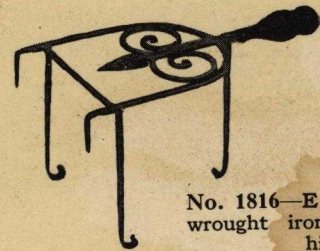

No. 743—Round tube frame in wrought iron finish, with polished brass handles. Conveniently light in weight, but strong and rigid in construction. Made to any size, with 6" or 7" projection.

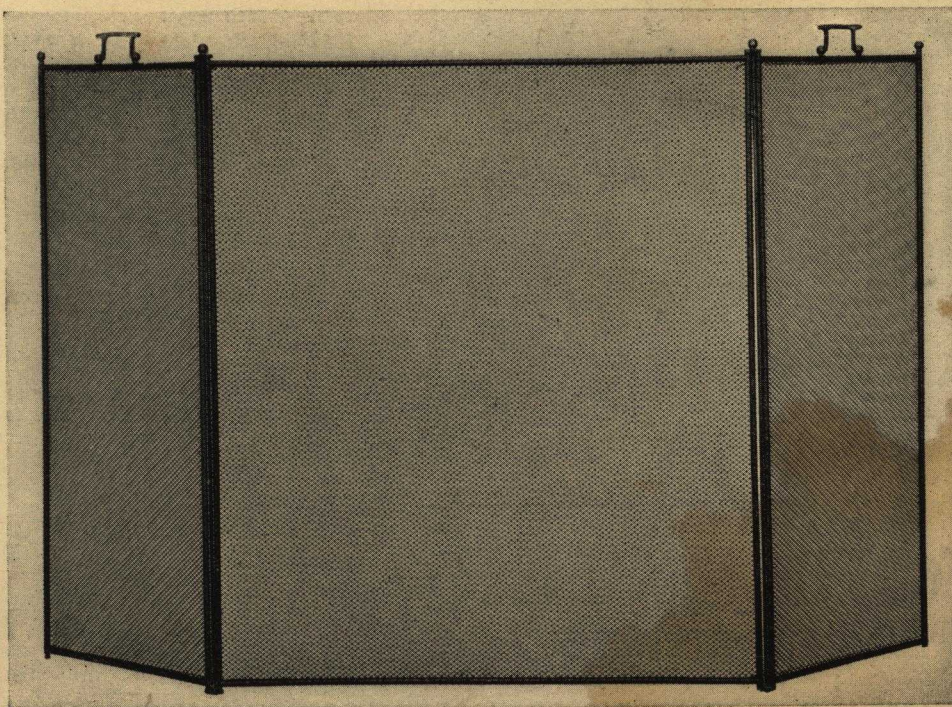

No. 2501—Brass firelighter in antique or bright finish, 6 1/2" high.

Torch for firelighter No. 2506
The hard clay end will absorb sufficient kerosene to burn for four or five minutes.

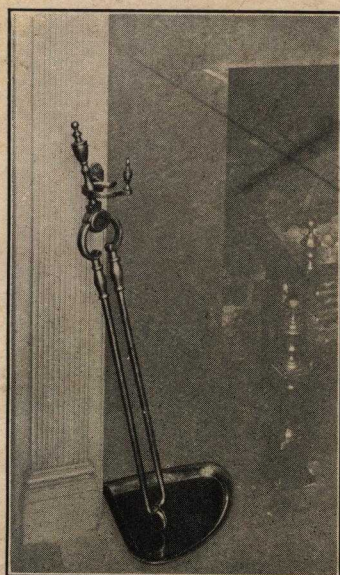

No. 1816—Early English wrought iron trivet, 6 3/4" high.

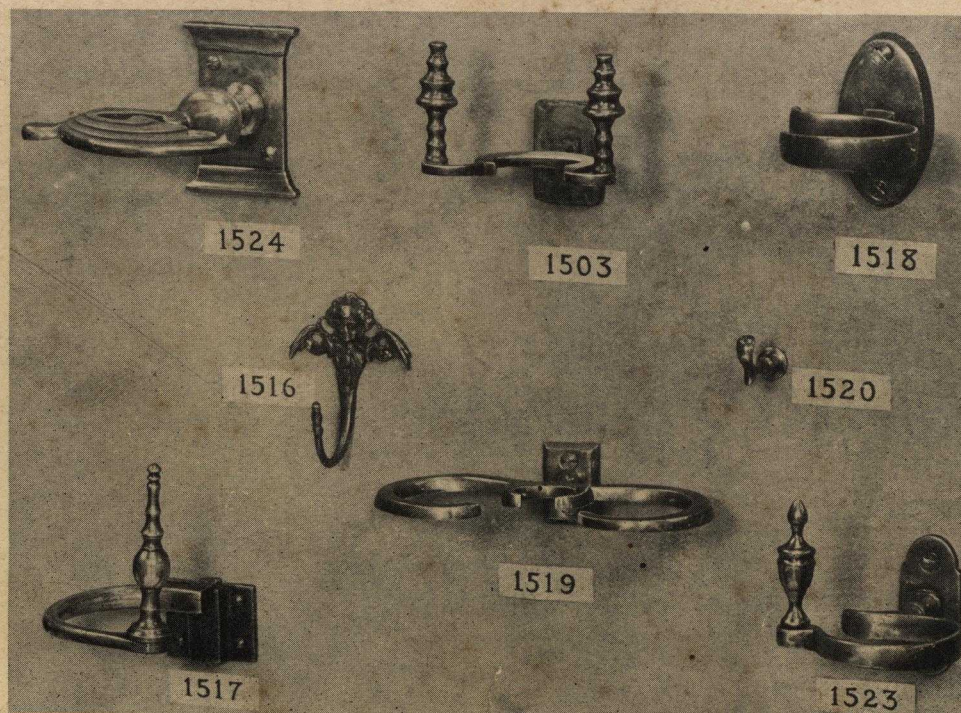

No. 2701
Brass chestnut roaster, 22" long.

No. 728—An inexpensive screen of good construction and finish. Heavy rodded frame in satin black finish, with bright brass handles and finials. Centre panel 26" wide x 30" high, sides 13". No. 728A—Same, made 26" high.

For fire openings 2' 6" to 4' 0" wide.

The jamb hooks can be attached to either the mantel or fireplace facing and are used with or without tray shown in illustration.

All the above are brass, in antique or bright finish and those shown below are hand wrought iron, in black or half polished finish.*

JAMB HOOKS

- 1502—Backplate $1\frac{1}{4}$ " x $4\frac{1}{2}$ ".
- 1503—Has sliding back plate concealing screws $1\frac{1}{4}$ " wide.
- 1504—Screw end. Projection $4\frac{1}{2}$ ".
- 1507—Back plate 1" x 3".
- 1509—Back plate $5\frac{3}{4}$ " x 11".
- 1515—Back plate $2\frac{1}{4}$ " x 3". Jaws of hook $\frac{3}{8}$ " wide inside.
- 1515A—Back plate 3" x $3\frac{1}{2}$ ". Jaws of hook $\frac{5}{8}$ " wide inside.
- 1516—Width $2\frac{1}{2}$ ".
- 1517*—Back plate $1\frac{3}{4}$ " x $1\frac{3}{8}$ ". Can be removed for cleaning.
- 1518—Back plate $1\frac{5}{8}$ " x $2\frac{1}{2}$ ".
- 1519—Back plate 1" x $1\frac{3}{8}$ ". Width over all $5\frac{3}{4}$ ".
- 1520—Projection $1\frac{1}{2}$ ", screw end.
- 1521—Back plate $1\frac{1}{2}$ " wide.
- 1523*—Back plate 1" x $2\frac{3}{8}$ ".
- 1524*—Back plate 2" x 3".
- 1525—Back plate 19" x $4\frac{1}{4}$ ".

Similar hooks not mounted on backplate are No. 1522.

1636—Solid brass tray. Projection $9\frac{1}{2}$ ".

*If not used in pairs, state whether right or left hand is desired.

709	275.00					"	31"x31" 15.00

*The above prices are for screens 36" wide x 30" high and are given only as a guide to approximate cost of other sizes. When ordering these screens, which can be made to any size, please give exact width and height of fire opening and for No. 707 type, the height and width of log bars where they are to pass through screen and distance apart on centers. As it is practically impossible to make any adjustment in size after a screen is made, it is very necessary to verify that the fire opening has been built absolutely true. If the opening is arched, a template is required.
